## PREFACE

3

This publication is a summary on the marketing of the 2008 United States Pecan Crop. The information contained in this report was compiled from market reports issued by the Federal-State Market News offices operated by the U.S. Department of Agriculture, Agricultural Marketing Service, and the respective State Departments of Agriculture. The following individuals contributed to the narratives found in this publication: Marcial Mike Rafanan and Robert J. Corwin, USDA Thomasville, GA; Steve Skuba and Paul Pasholk, USDA Phoenix, AZ.

We graciously acknowledge the information provided by the Foreign Agricultural Service and the Agricultural Statistics Service of the U.S. Department of Agriculture. We would also like to acknowledge and thank the growers, buyers, shellers and other segments of the pecan industry for their cooperation in supplying information that made these reports possible.

Additional copies of this summary may be obtained at the cost of \$20.00 per summary upon request from:

## **MARKETING GEORGIA PECANS – 2008 CROP**

**PRODUCTION:** According to the Georgia Agricultural Statistics Service of the United States Department of Agriculture, Georgia's final 2008 pecan production totaled 70 million pounds. Improved Varieties accounted for 66 million pounds while Native and Seedling brought in 4 million pounds. Total US production was 193,890,000 pounds. Georgia produced approximately 37 percent of the total national pecan crop in 2008. The total was about fifty-three percent less than the 2007 crop of 150 million pounds. Prices received by Georgia growers averaged \$1.47 per pound for Improved Varieties and \$1.00 for Native and Seedling. Last year the 2007 crop averaged \$1.10 for Improved Varieties and .72 cents for Native and Seedling. The total value of the crop for 2008 Georgia pecans was approximately \$101.02 million compared to \$159.30 million in 2007.

**GROWING CONDITIONS:** The harvest of the 2008 crop started in late September in areas of South and Middle Georgia with the Pawnee variety followed by a few early varieties including MoneyMaker and Native/Seedling. The time started is generally normal for most years. Many growers in the Thomas county and west got a later start due to the damaging effects caused from Hurricane Fay in late August. Losses were high in many of those areas, while farther north past Albany losses were not quite as significant, although the weather did affect some growers during harvest time. The middle of October brought in the harvest of Desirable, Elliott and Stuart varieties. Deliveries at this time were very light. The following week more rain was forecast and growers were delaying harvest in order to capture nuts by going over the fields in one sweep as fieldwork was slowed. The Cape Fear variety entered the market followed by Schley. Rain and cold weather affected harvest time and shuck split. The end of October brought better conditions and harvest was active, although deliveries were still fairly light. The start of November brought on better action in the fields and deliveries were moderate due to a warmer weather trend and drier conditions in the orchards that lasted through mid month, then rain halted harvest once again. This brought on wet and humid conditions. The Sumner variety came on toward the end of November and weather conditions improved allowing harvest to resume again. In the southern part of the state approximately ninety percent of the crop was harvested while in middle Georgia they have not yet reached fifty percent. Mild conditions prevailed through the Thanksgiving holiday. The first week of December brought on wet conditions again as rain kept fieldwork to a minimum. The end of the week showed signs of some nuts deteriorating in the fields as wet conditions continued. Some growers were almost finished harvesting. By the middle of the month the excess moisture was affecting the nuts still not harvested causing rot and mildew to show up, as the season is winding down. January was similar to the end of the prior month with most growers finished for the season and just cleaning up the fields by the middle of the month. Most of the deliveries were in the form of blends. The last report for the Georgia 2008 crop was issued on January 15, 2009.

## MARKETING GEORGIA PECANS – 2008 CROP

**MARKETING:** The first grower price report for Georgia pecans was issued on October 10 when bids and purchases were noted. Deliveries were very light with most purchases from the giftpack sector looking for lots with high quality, fund raising, and lots suitable for commercial shellers. Demand was light with prices starting at \$3.80-4.05 per point for lots of Pawnees less than 20,000 pounds. Lots over 20,000 pounds started at \$3.95-4.05 per point. High unit count lots (smaller nut size) brought in prices of \$3.70-3.80 for lots under 20,000 pounds. Prices for cents per pound in-shell in lots under 20,000 pounds with meat yields of 56-58% brought \$2.13-2.25 per pound, with high unit counts bringing in \$2.07-2.20. Lots over 20,000 pounds with meat yields of 56-59% brought in \$2.25-2.36 mostly \$2.25-2.27 per pound.

The middle of October had a moderate demand with yard tree lots of Desirable at \$1.25 cents per pound, Moneymaker 70-80 cents, fair quality 60-75 cents. Seedlings brought in 60-75 cents, occasionally high as 80 cents, while Stuarts sold for \$1.00 and fair quality 70-80 cents. By October 23, demand was stronger and prices higher for yard tree offerings. Interest was still strong for giftpack sales but moderate for in-shell commercial use. Prices for lots under 20,000 pounds of Cape Fear 52-53% meat yield \$1.82, Desirable 54-55% \$2.00-2.09, Elliott 53-54% \$1.80-1.84, Moneymaker 46-48% \$1.24-1.39. Lots over 20,000 pounds Desirable 54-55% meat yield \$2.08-2.13, Gloria Grande 49-50% \$1.77, Moneymaker 47-48% \$1.40 and Schley 60% \$2.04 per pound. Yard tree lots for Desirable \$1.25-1.40, Elliott \$1.40-1.50, Moneymaker 80-90 cents, Stuart \$1.00-1.25 fair quality bringing in 75-80 cents. Seedling ranged from a low of 65-85 cents mostly 70-75 cents per pound of good quality pecans. By the end of the month prices were lower for Desirable and higher for yard tree offerings. Demand was moderate for giftpack use and fairly light for commercial use.

November brought in lower prices as volume picked up in most areas. Lots under 20,000 pounds Cape Fear 52-54% meat yield \$1.57-1.61, Desirable 54-56% \$1.78-1.90, 51-53% \$1.68-1.80, 50% \$1.65-1.70, yard tree lots 1.25-1.50 cents per pound. Moneymaker 44-48% \$1.30-1.35, yard tree lots 85-110. Schley 61% meat yield \$2.06-2.07, yard tree lots 1.25-1.50. Stuart 48-50% meat yield \$1.44-1.60. Yard tree lots for Elliott brought in 1.25-1.40 cents per pound. For lots in excess of 20,000 pounds Cape Fear 55% meat yield \$1.65, Desirable 54-56% \$1.84-1.93, 52-53% \$1.77-1.86, Moneymaker 45% \$1.40 and Schley 61% with high unit count (above 69) \$1.93. The rest of November saw prices continue to lower as volume increased. Demand remained light. By the end of the month prices took an upswing and rose remaining about steady the rest of November.

December saw movement decrease and prices remained steady. Sales of Desirable with a meat yield of 52% or better brought in \$2.68-2.81 per point, Stuart 46% \$2.54-2.71 per point, and Cape Fear 52-54% \$2.60-2.71 per point. Sumner with 52-53% meat yield \$2.60-2.70 and Elliott 54-55% \$3.06-3.09 per point. Machine harvested blends 46-50% \$2.60-2.72, 53-55% \$2.72-2.74. Large lots over 20,000 pounds of blends 46-50% meat yield sold for about \$2.65-2.70 per point. The rest of December saw prices rise and fall as the season winds down. The last report for Georgia was January 15, 2009. Most lots were blends with prices for 49-53% meat yield \$2.20-2.30 per point, 46-48% \$2.20-2.29 and 42-45% \$2.15-2.25 per point. Lots over 20,000 pounds 48-51% \$2.25-2.35, while lots with 42-46% sold for mostly \$2.25 per point. Yard tree lots of Desirable 75-80 cents per pound, with Seedling bring in 60-70 cents per pound.

Marcial Mike Rafanan, Local Representative

# **MARKETING LOUISIANA PECANS – 2008**

**PRODUCTION:** According to the Louisiana Agricultural Statistics Service, the 2008 Louisiana pecan crop totaled 5 million pounds about 9 million pounds less than the 2007 crop which produced 14 million. Native/Seedlings produced approximately 25 percent of the total volume. The average price was \$1.35 per pound for Improved Varieties compared to \$1.20 the previous year. For Native/Seedlings the price for 2008 averaged .85 cents per pound compared to .70 cents in 2007. The total value in dollars was \$4.75 million compared to 11.3 million the year preceding.

**GROWING CONDITIONS AND HARVEST:** The first report for Louisiana pecans was on October 17, 2008. The crop was devastated by Hurricane Gustav and hampered harvesting in the beginning. Grower estimates were as high as a fifty percent loss with both the Native/Seedling and Improved Varieties. Loss of trees were reported in the southern part of the state with significant damage to trees as well. Weather continued to be problematic throughout the whole harvest season. Snow was reported in some areas the week of December 18. The last report was December 30, 2008 with more rain in the forecast.

**MARKETING:** The first price reports for Louisiana were on October 17. Deliveries were very light. Harvesting of Improved Varieties were just beginning. In lot of less than 20,000 pounds yard tree lots of the Candy variety brought 1.40 cents per pound in-shell. Desirable 1.50, Stuart 1.00 and Native/Seedling were bringing in about .50 cents per pound. By mid November prices dropped and weather played a major roll in marketing of pecans for Louisiana. Yard tree lots of Elliott brought in 1.10, Native/Seedling .60 cents per pound in-shell. For machine harvested pecans Native/Seedling with 42-43% meat yield sold for about \$1.00 and 37-39% yields brought .75-.80 cents per pound. Stuart with 45% meat yield or better sold for about \$1.25 with early sales bringing in \$1.50-1.60 per pound. Yard tree lots of Stuart sold for around 70-90 cents per pound, few low as 60 cents. For larger lots over 10,000 pounds Stuart sold for about \$1.25-1.50 per pound with meat yields ranging from 45-48%. December saw prices drop as most growers were trying to finish up harvest compounded by more heavy rains. Stuart prices brought around \$2.50 per point and machine harvested Natives sold for around \$2.55 per point. Desirables were selling for around \$2.60 per point.

Marcial Mike Rafanan, USDA, Thomasville, GA

## MARKETING OKLAHOMA PECANS – 2008 CROP

**PRODUCTION:** According to the Oklahoma Agricultural Statistics Service, Oklahoma produced 1 million pounds of Improved Varieties and 4 million pounds of Native/Seedling. This was a huge drop in production compared to the previous year's 30 million pounds. The average price per pound of Improved Varieties was \$1.60 and .80 cents for Native/Seedling. In comparison the 2007 prices were \$1.35 and .75 cents. The total value of the crop was approximately 4.8 million dollars, well below the 2007 estimated value of 24.3 million dollars.

**GROWING CONDITIONS AND HARVEST:** Some areas were severely hurt from December 2007 freeze that limited production which could have a lasting effect for up to three years. The northern areas had an early spring freeze that limited crop size while the southern areas expected a lighter crop due to an off year cycle. Some trade sources also indicated that there appeared to be a higher than normal degree of pecan scab and pecan weevil indications.

**MARKETING:** The first report of the season was issued on November 14, 2008. Deliveries and purchases were insufficient in volume to establish market prices. Buying interest was fairly good from retail in-shell use, but light for commercial buyers. The following week deliveries were light and most movement in small lots was for in-shell retail and gift pack trade. Buying interest was moderate and some buyers had to purchase nuts from outside sources to fill their needs due to a limited supply in Oklahoma. At the end of November, prices for machine harvested Natives in lots less than 1,000 pounds and 42-44% meat yield brought in \$1.50 while lots with a lower unit count (larger nuts) sold for about \$2.00 for in-shell cents per pound. Early December prices were lower than the previous week. Lots less than 1,000 pounds and 42-44% yield sold for about 1.30-1.50 while lower unit count lots sold for about 1.85-2.00. Lots in excess of 20,000 pounds showed lots with 37-42% yields selling for about \$2.20-2.45 per point, mostly \$2.20. Mid December had prices steady for high quality pecans and lower for others. Harvesting was expected to be completed by the later part of the month, around the 18<sup>th</sup>. Prices were lower than earlier in the month and many growers were holding on to the nuts for future sales. Native pecans with 42-44% meat yield sold for about .80-.90 in-shell cents per pound.

Paul Pasholk and Steve Skuba, USDA, Phoenix, AZ

**MARKETING TEXAS PECANS – 2008 CROP  
NORTH, CENTRAL AND SOUTHERN AREAS**

**PRODUCTION:** According to the Texas Agricultural Statistics Service, Texas's final 2008 pecan production totaled 30 million pounds. Improved Varieties accounted for 20 million and the remaining 10 million was in Native/Seedlings. This was quite a drop in production compared to 2007 when 47 million pounds was produced. The average price for Improved Varieties was \$1.22 and .83 cents per pound for Native/Seedling pecans. The price was lower for the Improved Varieties, but higher for the Native/Seedling. The overall average was \$1.09 per pound, slightly lower than 2007 which was \$1.10. Total value was approximately 32.7 million dollars compared to \$77.6 million a year earlier.

**GROWING CONDITIONS AND HARVEST:** Harvest began in mid to late October for Natives and a few Improved Varieties in the southern part of the state. Light supplies available at that time and a larger share of the harvest was expected to begin in early November. Wichita, Cheyenne, Pawnee and a few Natives were the first to be harvested. By the end of October, growers were waiting for the first initial freezing temperatures to allow for increased shuck split and nut drop, also lowering moisture levels. In early November the southern part of the state had an increase in production, while the Central part was still light. Rain was expected for several days in the central and western part of the state. By mid November the southern areas had completed harvest. Cold temperatures aided in the production with increase shuck split and dropped nuts. Early December brought on activity in the fields and harvest increased. The second week of December most areas had finished harvesting and the remainder was coming from the western areas of Texas.

**MARKETING:** The first price report of the 2007 pecan season was released on October 23, 2008 and the last report was on December 9, 2008. Demand was good for lots of high quality and buying interests for in-shell and gift pack use was strong. Prices ranged from \$1.75-2.50 per pound in-shell for gift pack sales. For lots mostly from 5,000 to 10,000 pounds prices for Wichita with yields of 54-58% sold for around \$1.75-2.00, Cheyenne 54-58% yield sold for about \$1.75-2.00 and lots of Pawnee yielding 57% sold for about \$2.20-2.50 cents per pound in-shell. Prices remained steady through the end of October. The start of November had prices dip slightly lower. Lots of Desirable with 53-54% meat yield brought in \$1.75-2.00, few best \$2.20. Lower yields ranged from \$1.50-1.75. Cheyenne with yields of 54-56% sold for about \$2.0-2.20 and Choctaw sold for the same as Desirable. Yard tree lots of Natives brought in .50 cents per pound in-shell. By mid November prices were lower, but by early December stayed about steady or started to rise and held steady until the season ended the second week of the month. Native pecans were sold for .75-.85 with yields of 40-42% and yard tree sales ranged from .50-60 cents. Machine harvested blends of Improved Varieties with 50-52% yields sold for .75-1.25 and for large lots in excess of 20,000 pounds Western Schley yielding 56-57% sold for about \$2.60-2.80 per point. Desirable and Natives were insufficient to establish market prices for large lots.

**MARKETING WESTERN IRRIGATED REGION  
(ARIZONA, NEW MEXICO, AND WEST TEXAS) PECANS – 2008 CROP**

**PRODUCTION:** According to the New Mexico Agricultural Statistics Service, New Mexico's final 2008 pecan production totaled 43 million pounds compared to 74 million in 2007. This accounted for approximately 26 percent of the total Improved Varieties for the whole US production. Total value was \$62.35 million, well below the figures for 2007 of \$96.2 million. The average price was higher in 2008 listed as \$1.45 per pound compared to \$1.30 a year prior for Improved Varieties.

According to the Arizona Agricultural Statistics Service, Arizona's final 2008 pecan production totaled 17.5 million pounds. That was far less than in 2007 when the total was 23 million pounds. Average price was listed as \$1.25 per pound for 2008, less than \$1.60 for the 2007 crop. For Improved Varieties the average price was \$1.45 and the average price for Native/Seedling was \$1.02 compared to .76 cents in 2007. Total value for pecans in Arizona was \$25.4 million in 2008 and \$36.8 million for the 2007 crop year.

See Texas narrative information on page (32) for production data from that state.

**GROWING CONDITIONS AND HARVEST:** In early December of 2008 growers were waiting for the first hard freeze in expedite the shuck split and nut drop. The early harvested pecans had shown no real indications of embryo rot or insect problems. Weather temperatures were in the low 30s with little trace of rain, however toward the end of the week of December 9<sup>th</sup> rain was forecasted for a few days. Weather was fairly cooperative through the end of the season.

**MARKETING:** The first report of the season was issued on December 2, 2008. Buying interest was strong for the gift pack sector and retail in-shell use, but light for commercial buyers. For lots in excess of 20,000 pounds , Improved Varieties of Western Schley with a meat yield of 54% or better sold in a range of about \$2.45-2.80 mostly \$2.75-2.80 per point. Lots less than 1,000 were insufficient in number to establish market prices. By the time the next report came out on December 4, the prices dropped. Western Schley in lots over 20,000 pounds with 57-60% yield sold for about \$2.65-2.85 per point, 53-56% sold for about \$2.40-2.50 per point. Lots less than 1,000 pounds mostly Western Schley with yields of 54-56% sold for around 1.25-1.50 cents per pound in-shell. Quality has been reported as generally good. Prices dropped once again and growers were storing nuts for grading and selling at a later date, as Export interest was light. By the middle of December prices rose for larger lots and remained about steady or slightly lower for smaller lots. Prices just before the holiday break decreased slightly. For lots over 20,000 pound Western Schley yielding 57-61% was sold for about \$2.50-2.65 per point, occasional lower. For smaller lots less than 1,000 pounds sales ranged from 1.00-1.20 cents per pound in-shell. By mid January prices dropped again. Prices held about steady until the end of the season. Improved Varieties mostly Western Schley large lots with 57-61% meat yield sold for about \$2.30-2.50 per point, small lots 54-57% yield sold for 1.00-1.20 cents per pound in-shell some as high as 1.25. The last report was issued on January 29, 2009.
